

Cavity Varnish With TCP & Xylitol V-varnish Premium

3 Various Flavors

Extend protection & Extend fluoride release!
Total care with V-varnish Premium!

Caries Prevention with V-varnish Premium

V-varnish Premium is a cavity varnish containing 50mg of sodium fluoride per 1ml. It also contains TCP and xylitol. It is applied to teeth for the purpose of delivering fluoride and treating hypersensitivity and for caries prevention. It has three flavors such as bubble gum, strawberry & melon. V-varnish Premium is packed in a single dose package, allowing easy mixing and application.

Fluoride Coating

V-varnish Premium is highly aesthetic even after the application on teeth.
